## More than just furniture and interior design

Our promise “More from wood” implies: In addition to products for furniture and interior design, EGGER also offers wood-based flooring (laminated, cork and design floors) as well as building products.

Depending on the use of the room, floors must have specific properties, while being easy and quick to install, robust, resilient, easy to clean and environmentally friendly. With three different flooring categories, EGGER covers the entire range of existing customer needs.

[www.egger.com/flooring](http://www.egger.com/flooring)

Whatever you are planning, with EGGER Building Products your project will succeed in a straightforward, efficient and reliable manner. You can choose from a wide range of environmentally friendly OSB flooring and straight-edged boards, square-edged boards, DHF underlay boards, Ergo Boards, Roofing Boards as well as timber.

[www.egger.com/building](http://www.egger.com/building)

# The environmental cycle – Why sustainability is more than just a word for us.

## Wood-based materials production and further processing

To continually improve our environmental performance in the production process, we are opting for internationally certified energy and environmental management systems in accordance with ISO 50001, ISO 14001 and EMAS.

## Sawmill

800,000 cubic metres of spruce and pine logs from sustainable forests are felled every year at our sawmill in Brilon. Sawmill co-products are directly processed further in the wood-based materials production.

## Sustainable forestry

We act responsibly with regard to forests and the environment and are certified according to ISO38200 PEFC™ and FSC®, depending on the availability of the wood. In line with the EU Timber Regulation, EUTR, we only buy timber from verified suppliers.

The mark of responsible forestry

Promoting Sustainable Forest Management  
www.pefc.org

## Consumer / Product Environmental Performance Assessments

We provide full transparency with Environmental Product Declarations (EPDs). They provide professionals with important information on environmental and health aspects, and are also available to interested end-users – for each of our base products.

## Recycling

Recycled wood, consisting of waste wood from disposed goods and those not fit for sale, is prepared and used for chipboard production.

## Renewable energy

We turn biogenic fuels, which can no longer be used, into heat and green electricity in our own biomass power plants.

# Wood-based materials contribute to climate protection ...

... and you can now get an idea of how exactly they do it. Because, for selected products in this brochure, we disclose information on their environmental performance:

## Product structure

-13.3 kg CO<sub>2</sub> / m<sup>2</sup>

27% recycled material  
32% by-products from the sawmill industry  
41% fresh resources

85% material from renewable resources  
15% material from fossil resources

### Carbon footprint\*

The CO<sub>2</sub> footprint can be used to measure *the size of the impact a product has on the climate*. For coated chipboard it is small, even below zero. Why? During its growth, the wood has absorbed more CO<sub>2</sub> than is emitted during transport and production processes.

### Contribution to the recycling economy\*\*

In order to conserve natural resources, we need to make the best use of existing materials. This indicator shows how well this can be done in practice. The coated chipboard *is made up of more than 50% recycled material or recycled by-products from other industries*.

### Contribution to the bioeconomy\*\*

Resources need different amounts of time to regenerate. Trees grow in a few decades, while fossil fuels need millions of years to form. The product components are compared within this indicator: How much material was *obtained from renewable raw materials* and, how much from fossil fuels?

## Full transparency from us and no paperwork for you

Save time and effort on publicly tendered or sustainably certified projects when it comes to submitting the right documents. Information on environmental and health aspects is already available – thanks to “fully declared” EGGER products.

# Decor match

When it comes to your projects, you don't want to compromise on design and quality. And you don't have to with our tried-and-tested set of matching decors and materials. All decors are available on classic melamine faced chipboard or MDF boards, Eurolight Lightweight boards or OSB Combiline as well as on laminate. In addition, we offer you edging solutions that are perfectly matched to the decor and texture.

Scan decor codes on the following pages to get more information about product and decor availability in the app.

# Eurodekor melamine faced chipboards

## YOUR BENEFITS

- Universally applicable
- Authentic decor and texture combinations close to the real material
- Optimal surface properties for durable applications (resistant to abrasion and scratches, lightfast and food-safe)
- Easy to process, maintain and clean
- Antibacterial (tested according to JIS Z 2801 / ISO 22196)
- Environmentally friendly and recyclable
- Ready to use immediately – no oiling, staining or other protective measures
- Available in decors which coordinate with other EGGER products

Whether for fronts, shelves, wardrobes or wall claddings it is the optimal product solution for your furniture or interior design project. It consists of raw chipboard coated on both sides with melamine resin impregnated decorative paper. It can be easily cut, edged and processed.

# Eurodekor melamine faced MDF boards

## YOUR BENEFITS

Eurodekor melamine faced MDF (medium-density fibreboard) boards have surface textures identical to melamine faced boards. Thanks to their core, consisting of fine, homogeneous fibrous material, they are ideally suited for applications in furniture and interior design that require high-quality edging or surface milling (e.g. Slat walls, furniture fronts).

- Fine, regular surface
- High surface density for exceptional surface smoothness and suitability for profiling
- High transverse tensile strength and edge stability
- Reduced swelling behaviour
- Authentic decor and texture combinations close to the real material
- Available in decors and textures which coordinate with other EGGER products

» Find out more at [www.egger.com/eurodekor-mdf](http://www.egger.com/eurodekor-mdf)

# Eurolight Decor

## YOUR BENEFITS

- Lightweight
- Robust
- Bending resistant
- Conserves resources thanks to the cardboard honeycomb core
- Recyclable
- Honeycomb core enables easy, invisible installation of electronic components
- Authentic decor and texture combinations close to the real material
- Available in decors and textures which coordinate with other EGGER products

Eurolight Decor is a melamine faced lightweight board with extremely stable chipboard top layers that sandwich a lightweight yet robust hexagonal cardboard honeycomb core. Despite their low weight, they are very stable and provide numerous design and construction possibilities for furniture and interior design.

» More information about Eurolight Decor is available at [www.egger.com/eurolight-decor](http://www.egger.com/eurolight-decor)

### Product structure

 **CO<sub>2</sub>** – 7.86 kg CO<sub>2</sub>/ m<sup>2</sup>

 10 % recycled material  
42 % by-products from the sawmill industry  
48 % fresh resources

 82 % material from renewable resources  
18 % material from fossil resources

# Eurodekor Plus

Eurodekor Plus are multi-layered laminated wood-based material boards. These boards offer a high-quality surface for particularly heavy-duty areas in furniture and interior design. This makes them ideal for project sectors such as office furniture, horizontal surfaces generally and furniture in public areas, as well as high-end shopfitting. Depending on the application and the load, the composition may vary. The multi-layer structure uses an underlay (so-called barrier paper). Brown barrier paper is used for standard decors (for Eurodekor Plus ML) while white barrier paper is used for white decors (Eurodekor Plus MW).

» For more information, see [www.egger.com/eurodekorplus](http://www.egger.com/eurodekorplus)

## YOUR BENEFITS

- High impact resistance
- Very good screw pull-out strength
- Environmentally friendly and recyclable
- Increased bending strength
- Authentic decor and texture combinations close to the real material
- Available in decors and textures which coordinate with other EGGER products

### Product structure

Scan the decor code using the app.

# Eurodekor OSB Combiline

## THEIR BENEFITS

- Low formaldehyde content
- Very good bending strength
- Very good screw pull-out strength
- Recyclable
- Authentic decor and texture combinations close to the real material
- Available in decors and textures which coordinate with other EGGER products

Eurodekor OSB Combiline is a heavy-duty composite panel with a middle layer of OSB, a double-sided top layer made of thin MDF, and decorative melamine faced coating. It combines the excellent bending strength of OSB board with the suitability for lamination and lacquering of an MDF board. It offers the optimal solution for furniture and interior design exposed to heavy bending stress, such as partition walls, stage and exhibition construction or shelves.

» Find out more at [www.egger.com/eurodekor-osb-combiline](http://www.egger.com/eurodekor-osb-combiline)

### Product structure

31% by-products from the sawmill industry  
69% fresh resources

91% material from renewable resources  
9% material from fossil resources

U999 ST9

# Laminates

EGGER Laminates combine resistance with attractive design. They are the ideal solution for horizontal and vertical surfaces exposed to medium or high stress as well as for curved or rounded elements. As a decorative coating material, they can be glued on chipboards and MDF boards as well as on multiplex, plywood boards or other core materials. The EGGER Decorative Collection includes Laminates in postforming quality (postformable), standard quality (not postformable) and flame-retardant laminates. MED\*-certified laminates are also available for use in ship interior fittings.

» For more information, see [www.egger.com/laminates](http://www.egger.com/laminates)

## Product structure

**CO<sub>2</sub>**  2.29 kg CO<sub>2</sub> / m<sup>2</sup>

 57% material from renewable resources  
43% material from fossil resources

\*Marine Equipment Directive

## THEIR BENEFITS

- Durable, lasting, and easy to maintain
- Coating material for wood-based materials and other core materials
- Wood reproductions offer a cost-effective alternative to solid wood and veneer
- Easy to process
- Available in decors and textures which coordinate with other EGGER products
- Antibacterial Type P (tested according to JIS2801/15022196)

Scan the decor code using the app.

All decors shown and mentioned are reproductions.

# Laminates XL

## YOUR BENEFITS

- Extra wide format can reduce cutting waste
- Natural look and feel for all wood reproductions
- Uni decors available, ideal for extra-wide doors, for example.

Laminates XL with their 2790 × 2060 mm format can reduce cutting waste. In wood reproductions of this size, the surface texture is synchronised with the decor image. This is how our Feelwood decors are created, with a look and feel that can hardly be distinguished from solid wood or veneer. Uni decors in the XL format are also available for use on extra-wide interior doors, such as in hospitals or hotels. All XL Laminates are also MED-certified (Marine Equipment Directive) and therefore also suitable for use in ship interior fittings.

» For more details see [www.egger.com/laminates-xl](http://www.egger.com/laminates-xl)

Scan the decor code using the app.

H3408 ST38

## Laminates with coloured core

Laminates with coloured core consist of several layers of the same colour of decor paper. In the case of mitred furniture, this results in the edges remaining almost seamless. When combined with solid wood edging the homogenous composition of Laminates with coloured core reduces the visibility of the joint between the surface and the edge, such as on the edge of a door.

» More information is available at  
[www.egger.com/coloured-core-laminates](http://www.egger.com/coloured-core-laminates)

### YOUR BENEFITS

- Continuous, homogeneous look
- Perfect joint lines, especially in the case of mitred boards
- It can also be used as a design element in combination with solid wood concealed edge bands
- Can be coordinated with EGGER Compact Laminates with coloured core due to the same decors and textures being available for both products.

## Door size laminates

### YOUR BENEFITS

- Door formats with minimal cutting waste
- Coordinated design from the interior door to the furniture
- Durable, lasting, and easy to clean

Thanks to its robust surface, the laminate is highly suitable for the decorative design of interior doors. 81 decors of the Decorative Collection are also available in the most widely used door formats 2150 × 950 mm and 2150 × 1020 mm in single sheet quantities. As the door laminate uses the same decors and textures as other products, such as melamine faced boards and edges, they can be harmoniously combined. This creates a perfectly coordinated interior design from the door to the furniture.

Scan the decor code using the app.

# Laminate bonded boards

Laminate bonded boards are composite elements consisting of either raw chipboard, MDF boards, OSB Combiline or Eurolight lightweight boards that are coated with decorative laminate. The coating of the coreboards on the front and back depends on the later use and / or the customer specifications. The same laminate is usually used on both sides.

## YOUR BENEFITS

- Wide range of possible combinations of decors and core materials
- Selected decors also available in the flame-retardant version “Flammex”

» More information available at [www.egger.com/laminate-bonded-boards](http://www.egger.com/laminate-bonded-boards)

### Product structure

W1000 ST9

# Edging

Furniture as if made of one piece or with accentuated designs can be created by matching the decorative board and edging in terms of colour, texture, and degree of gloss. The large selection of edges in the EGGER Decorative Collection offers solutions for all your design wishes – both with regard to colour and to contrast.

---

 More information is available at  
[www.egger.com/edgings](http://www.egger.com/edgings)

Scan decor codes on the following pages to get more information about product and decor availability in the app.

# ABS edging

## YOUR BENEFITS

- Colour and texture perfectly coordinated with the decors of the board
- Board material and edging from a single source saves time and effort
- Extended stock range with more than 3000 items
- Edging available at short notice starting from one roll
- For the first time, 9 digitally printed decors suitable for worktops included in the product range

ABS edging is used to finish the exposed edges of decorative wood-based materials such as chipboard, MDF boards, OSB Combiline and Eurolight lightweight boards. They provide the finishing touch for all our decorative coatings. ABS edges are available in a wide range of widths and thicknesses. In terms of decor, texture and degree of gloss, they are perfectly matched to our range of colours and decors.

### The edging you want:

With the Edge Configurator, our web-based online service, you can order suitable edges in individual widths between 12 and 100 mm according to your needs and wishes.

» For more information, see  
[www.egger.com/edge-configurator](http://www.egger.com/edge-configurator)

Scan the decor code using the app.

H3158 ST19

# ABS end-grain edging

The end-grain edging highlights the natural effect of the decors. In combination with the matching longitudinal edge, it creates a coordinated overall picture that reproduces the look of sawn timber.

» For more details see  
[www.egger.com/end-grain-edgings](http://www.egger.com/end-grain-edgings)

## YOUR BENEFITS

- Creates the appearance of a tree trunk cut across the length showing its annular rings
- Reproducible decors
- Very close to the look of how nature intended

# ABS & PMMA accent Edging

## YOUR BENEFITS

- Easy and cost-effective way of creating a feature
- Create trend orientated designs with little effort
- Create eye-catching designs with accents

ABS and PMMA accent edging in the EGGER Decorative Collection showcases how the greatest possible effect can be achieved with little effort. Furniture design is increasingly focused on combining a variety of materials. Accent edges in combination with uni colours or wood and material reproductions enable a variety of creative combinations.

» Compare same decor or accent edges in combination with board decors at [www.egger.com/edging-variety](http://www.egger.com/edging-variety)

Scan the decor code using the app.

**Doppia:**

Its use turns any piece of furniture into the design element in the room. Together with the PerfectSense Matt or Gloss surfaces, this Accent edging creates the optical appearance of real glass.

**Duo:**

They consist of two equal-sized strips which have been matched with two decors from the collection. An inside-outside look can be achieved by placing this edging on a board with the same decor appearance.

**Trio:**

Its colour and design combinations emphasise the visual contrast between different materials – from woodgrain through to metal – creating numerous design possibilities.

**Carbon:**

It can be used to create a strong accent, bringing a “material” character into focus. Or a more harmonious contrast can be created when combined with aluminium, black, or black wood types.

**Linea:**

This edging variant sets a strong graphic accent on many uni decors, wood and material reproductions. It harmonises particularly well with aluminium, black, or black wood types. Its linear texture can be felt as well as seen.

**Three-layer:**

This creates the look of a three-layer solid wood or Plywood board sheet. It can also be used to create a natural accent in combination with uni colours.

**Multiplex:**

Using multiplex is again very popular in interior design. Multiplex edging offers the possibility to combine the look of a thin-coated multiplex board with the entire range of our uni colours.

**Used Metal:**

This edging can be used to create strong accents in combination with white uni colours and adds a modern “material” contrast. Brown wood or grey uni colours also work well colour-wise with this edging.

# Compact laminates

With our Compact laminates you can meet your customers' requests for a robust, food-safe and moisture-resistant material. Thanks to minimal waste when cutting the board, you can execute your projects in an economical and cost-efficient manner. For a coordinated approach the decors and textures can be combined with other EGGER products.

---

 More information is available at  
[www.egger.com/compactlamine](http://www.egger.com/compactlamine)

---

Scan decor codes on the following pages to get more information about product and decor availability in the app.

# Compact laminates

## YOUR BENEFITS

- Resistant and durable
- Moisture-resistant
- Hygienic and easy to maintain
- Resistant to everyday cleaning products and chemicals
- Extraordinary edging design
- Available in decors and textures which coordinate with other EGGER products

Compact laminate has an attractive design and outstanding product characteristics. The extreme durability and moisture resistance make them the ideal material for indoor applications with high impact and increased demand for hygiene and cleanliness, such as in kitchens, bathrooms, sanitary rooms, hospitals, or restaurants. Compact laminates with coloured core (white, light grey, dark grey) set particular contrasts and accents in furniture and interior design.

63% material from renewable resources  
37% material from fossil resources

F204 ST9

# PerfectSense

No matter if the goal is an elegant and comfortable feeling of space or creating an air of exclusivity – PerfectSense provides the ideal combination of visual perfection and textured experience. In addition to the well-known uni decors in gloss and matt, the new collection now also includes material reproductions, partly with mother-of-pearl effect. This enhances especially well certain gloss and matt decors.

# PerfectSense lacquered boards

## YOUR BENEFITS

- High-gloss and matt MDF lacquered boards
- Supplied with protective film
- Board width of 2070 mm optimised for cutting
- Significant freedom of design through the set of coordinated decor and material combinations with EGGER Laminate, Edging, etc.

The high-quality PerfectSense lacquered boards, with matt or high-gloss surfaces, and the new Laminate PerfectSense Topmatt are striking, both visually and to the touch. As part of the EGGER Decorative Collection, they are perfectly suited for upmarket furniture and interior design due to their exclusive high-end look.

The decor range for PerfectSense has been extended: 11 PerfectSense Gloss and 13 PerfectSense Matt decor options are available for you to choose from. You can find all decors on page 83.

### Product structure

67% by-products from the sawmill industry  
33% fresh resources

80% material from renewable resources  
20% material from fossil resources

## PerfectSense Gloss lacquered boards

PerfectSense Gloss (PG) dazzles with its high sheen and represents pure luxury. Rooms appear lighter and larger thanks to its high degree of gloss and its reflective nature. Laminate with the texture HG is available for combinations with high-gloss lacquered boards. The degree of gloss may vary.

» For more information, see  
[www.egger.com/perfectsense-gloss](http://www.egger.com/perfectsense-gloss)

### YOUR BENEFITS

- PerfectSense Gloss is ideal for creating exclusive and modern furniture design
- PerfectSense Gloss stands out due to its unblemished surface, extreme reflective nature and a special gloss effect

## PerfectSense Matt lacquered boards

PerfectSense Matt (PM) is fully on trend with its matt, velvety surface. PerfectSense Matt has anti-fingerprint properties thanks to its high-quality finish. Touching the surface is definitely allowed. Laminate PerfectSense Topmatt (PT) is available to match all matt lacquered boards.

» For more details see  
[www.egger.com/perfectsense-matt](http://www.egger.com/perfectsense-matt)

### YOUR BENEFITS

- The anti-fingerprint properties of the PerfectSense Matt lacquered board prevents marks even on frequently touched surfaces, such as handleless fronts
- Minimal cleaning effort
- The matt surface and anti-fingerprint properties are in line with current trends

F206 PM

# Laminate PerfectSense Topmatt

## YOUR BENEFITS

- Suitable for horizontal and vertical use
- Super-matt, velvety-warm surface with anti-fingerprint properties
- Laminate PerfectSense Topmatt (PT) is available in the same decors as all PerfectSense Matt lacquered boards
- Selected decors also available as worktop

Laminate PerfectSense Topmatt (PT) is ideal for heavy-duty horizontal surfaces. It is well suited to areas where a combination of matt design and durability is required.

» For more details see [www.egger.com/perfectsense-topmatt](http://www.egger.com/perfectsense-topmatt)

# Postforming worktops

## YOUR BENEFITS

- Large, contemporary decor selection available
- Resistant to abrasion, impact and scratches
- Hygienic and food-safe
- Stain-resistant and easy to clean
- Splashback panels and worktop wall profiles are available to match the worktops

The Postformed worktop is the established and classic laminate worktop solution. Its enduring appeal is down to the lack of a join, owing to the top surface continuing over the radii and underneath. At the front longitudinal edge, the thin chipboard support edge ensures high impact resistance and surface smoothness.

# Feelwood worktops with edging

This worktop achieves its natural look thanks to the texture being synchronised with the decor image. The front long side is edged with 1.5 mm ABS edging in the same decor using a PUR hot-melt adhesive. Matching end-grain edges for the short ends can be applied to underline the natural effect of the decors and create an overall appearance that can hardly be distinguished from solid wood. This gives your customers a high-quality worktop with a natural look and feel.

## YOUR BENEFITS

- Authentic wood reproductions
- Resistant to abrasion, impact and scratches
- Splashback panels and worktop wall profiles available to match each worktop

# PerfectSense Topmatt worktops with edging

## YOUR BENEFITS

- Super-matt, velvety-warm surface
- Little cleaning effort thanks to the anti-fingerprint properties
- Resistant to abrasion, impact and scratches
- Thin design for a modern look
- Splashback panels available in the same decor and texture

A very attractive, new solution is this thin worktop based on a 16 mm MDF board. Its surface is made of a super-matt, velvety-warm PerfectSense Topmatt laminate with anti-fingerprint properties. The front longitudinal edge features 1.5 mm ABS edging. This worktop can be your response to the trend for thin and at the same time matt materials.

# Compact laminate worktops

The worktop range is completed with the new 12 mm Compact laminate worktop. It features a 1 × 1 mm bevel milling on both the upper and lower part of the edge on all sides. This highlights its modern look as do the core colours black, white, and light grey. Your customers will enjoy this moisture-resistant, particularly robust worktop for a long time.

» Find out more at

[www.egger.com/compact-worktops](http://www.egger.com/compact-worktops)

## YOUR BENEFITS

- Robust and durable worktop thanks to the homogeneous structure of the Compact laminate
- Thanks to its resistance to temperature, humidity and water it is well suited for use in the kitchen
- Thin design for a modern look
- No edging or edge processing is necessary
- Splashback panels available in the same decor and texture

### Product structure

63% material from renewable resources  
37% material from fossil resources

# Splashback panels

## YOUR BENEFITS

- Durable splash protection
- Available in the same decor and texture as the worktop
- Also available in 5 contrast decors
- Ideal for covering an existing tiled backsplash area
- Easier to process than for example glass

Splashback panels give the kitchen a modern, attractive look. Designed in the same decor or as a Contrast splashback panel, this robust splash guard can become a real eye-catcher. They are available in all worktop decors as well as in five contrast decors in the format 4100 × 640 × 8 mm and are based on a chipboard coated on both sides with Laminate.

» Find out more at  
[www.egger.com/splashback-panels](http://www.egger.com/splashback-panels)

Scan the decor code using the app.

# Accessories

## Laminates

For all worktops there is a laminate in the same decor and texture available. For most of the worktops, a 0.60 mm thick and 1310 mm wide laminate is also available, which we will be happy to cut to the desired length between 2000 and 5610 mm.

## ABS edging

For worktops with chipboard or MDF core material, we offer an edging solution in the same decor and texture. For Compact laminate worktops, no additional edging is required. For the Feelwood worktops with the synchronised surface textures ST32 and ST37, you will receive as an addition ABS edging with an end-grain appearance. The decorative reference of these Accent edges starts with a "Q".

## Worktop connectors

Worktops on the basis of 16 mm MDF boards and 12 mm Compact laminates require the use of special fittings. The connectors are adapted to the thickness of the worktop and are available in pairs.

Connector for 16 mm worktops

Connector for 12 mm worktops

» Find out more at [www.egger.com/worktops-accessories](http://www.egger.com/worktops-accessories)

## Fastening set for sinks

The fastening set for sinks includes skirtings made of solid wood (two pieces each in the size 1000 × 20 × 16 mm and 500 × 20 × 16 mm) as well as suitable screws for PerfectSense Topmatt worktops. In the case of Compact laminate worktops the skirtings can be glued.

## Metal traverse for floor cabinets

Metal traverses are a proven solution for cabinet and worktop stabilisation. These also allow the screwing of the worktops onto the floor cabinet. Metal traverses for stove and sink cabinets in the cabinet widths 600, 800, 900, 1000 and 1200 mm are available.

## Sealing for corner connections

The seal protects the corner joint very well against penetration of moisture. It is available in the colours grey, white, black, and brown.

## Worktop wall profiles

For all of the Postformed worktops and Feelwood worktops with edging, we offer the worktop wall profiles in the format 4100 × 25 × 25 mm individually packed in foil. Matching inside and outside corners as well as end cappings are available.

# Flammex

## Flame-retardant products

Schools, hospitals, hotels, shops and other public institutions have high needs for fire protection. Our flame-retardant products are classified according to the European standard EN 13501-1 and meet the strict requirements for Euroclass B products. Flammex products are highly functional without limiting design flexibility. Eurodekor chipboard Flammex, Eurodekor MDF board Flammex, and Laminate Flammex are available in more than 200 different decors. The selection of Compact laminate Flammex with black panel core includes more than 180 designs.

» For more information visit  
[www.egger.com/flammex](http://www.egger.com/flammex)

In the app, filter decors for products with low flammability.

## YOUR BENEFITS

- Inhibits the development of fire and creates time for fighting the fire
- Reduces smoke and drop formation in case of fire
- For your safety – regular checks by external testing institutes

# Textures & Surfaces

In the age of advancing digitalisation, the feel of an object has become increasingly important. That is why we pay particular attention to our textures and surfaces. The harmonious feel which complements the decor image completes the overall design. With expressiveness, character, depth, and naturalness, we come as close as possible to the original. You can therefore create outstanding projects to the full satisfaction of your customers.

Experience textures & surfaces in the app

1. Launch the EGGGER Decorative Collection App on your smartphone.
2. Use the scanning function to capture any texture code in the collection.
3. You get access to your selected texture and the decors available with it.
4. You can view the entire board as well as display it in 3D.

## Wood textures

Only the right texture makes a woodgrain reproduction stand out. Our woodgrain textures are created with matt-gloss effects, gently brushed pores, soft hollows or a lively natural appearance.

An authentic texture for natural, striking, and rustic decors, well suited for solid wood reproductions.

An all-over pore finish, with irregular distribution and pores of various depth, which give the surface a natural appearance. A light sub-texture provides a velvet touch.

It combines cut flowered sections with linear areas. The matt and gloss woodgrain of the texture gives the decor an exciting and at the same time natural overall appearance. On calm and lightly-planked wood reproductions, it looks as if synchronised. It has the appearance of lacquered wood on uni colours.

This texture adds to linear and lively woodgrain decors more naturalness and a reflective nature thanks to its feel and matt-gloss areas.

Scan the texture code using the app.

# Feelwood

The name Feelwood already suggests the visual and sensory experience and therefore the added value offered by these textures. Feelwood provides a quality that combines the best of two product worlds: Thanks to the perfect coordination of texture and decor, these textures look and feel almost like veneer or solid wood. At the same time, they also offer the performance advantages of a melamine faced surface.

This texture is synchronised with the print cylinder of the Gladstone Oak and emphasises the sand-blasted character of this oak decor.

It has been synchronised with the decor image of the Sherman Oak. Its reclaimed or used wood look is particularly in demand. The visual damage and markings in the wood are accentuated by the synchronised pore texture.

The Feelwood Crafted texture displays an interplay of matt and light-gloss elements. The matt and softly brushed pore gives the surface a beautiful reflective nature, resulting in a very natural look that shines with a pearlescent effect.

This texture exhibits a deeply brushed yet very natural, matt character that gives many different types of wood an extremely authentic feel.

This texture showcases the authentic look of a solid wood surface. Its texture is synchronised with the decor series Halifax Oak, which features deep and tactile cracks.

The texture features a brushed softwood finish with a high-quality mother-of-pearl effect made of matt and gloss elements. Uni colours in combination with this texture look like painted or lacquered solid wood.

# Material and metal textures

Reproductions of stone and metal are becoming increasingly important. These decors are given the desired authenticity and character through the appropriate texture.

It has a plastered look, containing both deep and raw, smooth and glossy elements. It creates an industrial effect on concrete, metal, and stone reproductions. It provides uni colours with a striking material character.

This texture was developed to enhance decors reproducing real materials. It gives the mother-of-pearl and metallic decors the look and feel of finely polished metal.

It was developed especially for worktops. The texture gives material reproductions and uni colours a matt and velvety feel. It works particularly well on marble.

This texture is based on a mottled and softly brushed natural stone surface. It can be applied on a number of different stone reproductions, including on slate and marble.

This texture exhibits pronounced matt-gloss effects, simulating the surface and feel of a ceramic sheet.

The texture displays a granite character through its rough texture, reflective nature and with the interplay of matt and gloss.

Scan the texture code using the app.

## Matt and high-gloss surfaces

Decors achieve their strong effect by being paired with the most appropriate texture.

A smooth surface for laminate with a high-gloss level, especially suited for uni colours and premium woodgrain decors. ST30 is available with different gloss levels for Eurodekor.

PerfectSense Gloss has a striking reflective nature combined with high levels of surface smoothness.

An unusually warm and velvety feel combined with high resistance and anti-fingerprint properties are the benefits of PerfectSense Matt and PerfectSense Topmatt.

A surface which couldn't look any smoother. The effect is mainly seen in combination with uni colours.

Robust, striking, and very resistant. This surface is best used with uni colours and pearlescent decors.

Gives both uni colours and wood decors a very natural feel and follows the trend towards matt finishes.

A smooth, flat, and easy-care surface with reduced gloss. It highlights the quality of elegant wood and material reproductions.

# Trend worlds

Today's interior design trends frequently come without clear guidelines.

For many years, people have been focussing on "Mix+Match". This has eventually led to more and more design themes. We have used these new trend worlds as a basis for the development of our new decors.

On the following pages, we will show you how varied today's design trends are.

---

 Discover all trend worlds at  
[www.egger.com/trend-worlds](http://www.egger.com/trend-worlds)

---

Scan decor codes on the following pages to get more information about product and decor availability in the app.

## Popular classics with a modern twist

The Modern Classics trend includes our best-selling woodgrain decors. Well-known classics from the maple, cherry, or oak families continue to be popular with a natural, yet modern and timeless appearance. This is why they are chosen for long-term projects.

The colour scheme of these woodgrain decors has been redeveloped to allow for combinations with modern materials and uni colours. If uni colours and wood reproductions in this trend world are combined with each other, the result is a modern classic room design.

## The combination of past and future

The future is more tangible than ever. Technical and digital developments have made amazing progress.

The yearning for old and trusted values, timeless classics, and particularly the warmth of the 50s and 60s is on the rise. The expectations of this trend are met by integrating classic materials – marble, textile or walnut – into the new EGGER Decorative Collection.

Modern reproductions and natural textures, such as the new, authentic surface ST19 Deepskin Excellent, can be found in the trend world Future Retro. The classics are being rediscovered in new combinations to trend themes such as black or metal.

## Where authenticity is desired

Authentic wood types and the charm of products made by hand remain a fixed design element in modern rooms. Feelwood synchronised pore surfaces also suit the tactile reproduction of such a look. Cracks are noticeable and knots

are deepened. The new synchronised pore ST32 Feelwood Vintage brings the woodgrain to life with its rough matt-gloss effects. Of course, there are also current green tones in the trend world Pure Nature.

# PURE *nature*

# PERFECT

# *imperfection*

## Perfection meets emotion

Perfection can be easily achieved with the help of the latest technology, but this is not always desirable in design. Irregularities and imperfections, such as cracks, splinters, handmade elements, or weathering are also purposefully used in this case in order to achieve a finish full of emotions and with a natural appearance.

The role is texture of becoming increasingly important in the age of many digital products. The heavy Used Look or Industrial Style in combination with very calm and straight-lined designs creates the trend world Perfect Imperfection.

# LIGHT *urban*

## Urban design charm

Urbanisation as a megatrend increasingly influences design. Small living spaces in cities must not only be seized well, but should also be designed in a minimalist way. The influence of Scandinavian design, with its light materials, has become significant.

Cool combination materials, such as concrete, metal and light neutral grey tones that create the link with urban charm populate the trend world Light Urban.

## The wide spectrum of black

Under the motto “Black is back”, black has found its way back into design via accessories such as handles and metal frames. Black also increasingly appears on the surface and becomes an elegant contrast in ultra modern designs.

But how much black can one room take? The various Black Options play a role here: High gloss and

perfectly matt surfaces already allow the darkest uni colour to look entirely different. The new EGGER Decorative Collection also offers various options for basic black tones, such as Soft Black and Shadow Black. In addition, wooden surfaces, combined with black or wood types interpreted in black, from elegant to natural, provide a wide range of possibilities for this theme.

## Colourful harmony

Monochrome designs are both minimalistic and harmonious, and fit well into our smart world. As a rule, people look for harmony in the places where they retreat, but emotions and liveliness should not be missing. These emotions come from a varied colour profile, featuring colours of different intensities within the same colour world. This also

characterises design terms such as Nearly Black and Nearly White. In addition to trendy uni colours from the categories of nude, taupe, and grey blue, wood and material reproductions are also of high importance in the trend world Coloured Monochrome.

## Designs with technical coolness

Hybrid products satisfy the desire for simple solutions within the trend for synchrony. For this reason, the trend world Metal Fusion includes decors that are made, for example, by fusing the character of metal and stone.

Likewise, purely metallic optics are used increasingly in designs. They represent innovation as well as the future, and add technical coolness to design.

The new surface ST20 Metallic Brushed now also gives metallic reproductions an authentic look and feel.

## Seductive matt designs

Matt surfaces create very subtle, textured emotions. A certain naturalness is therefore also possible for uni colours. The lacquer finish PerfectSense Matt creates a high-quality, inviting look and feel on uni

colours as well as on a wide variety of materials. Furthermore, the surface provides impressive wear resistance. All are present in the trend world Matt Emotions.
